944-005,023REMARKS

This paper requests entry of an amendment under 37 CFR 1.312 changing the claims only to remove the phrase "the steps of" in claim 33, and so in a way believed unrelated to patentability.

Applicant has amended claim 13 to change "further means" to "a further electronic component." Applicant has amended claim 17 to change "isolation means" to "electronic component." The support for the amendment can be found in Fig. 7a (PIN diodes 50, 52) and Fig. 7b (LNA 224, 244).

Applicant has also amended claim 25 to change "means" to "a matching element." The support for the amendment can be found in Fig. 2B (matching element 92).

No new matter has been introduced.

It is believed that all of the claims of the application are still in condition for allowance and their passage to issue is earnestly solicited.

Respectfully submitted,

Kenneth Q. Lao
